### ABOUT ME

In regards of my restaurant career and life experience, my mindset keyword is resilience. This was very helpful to engage throughout this journey that I embark on. When I decided to move from Brazil to Australia, I've learned that people can perform every kind of work and I always thought that if you are doing something, whatever it be, do your best. Programming was a challenge thing to me but never impossible to dream with.

So code became an unexpected && addictive passion.

So I'm looking forward to learn && learn. For me hard study and focus are the keys of success. My goal is to solve problems in the most simple way possible and I'm good on it.
